

Evofem Biosciences to Present at Cantor Global Healthcare Conference on October 4, 2019

SAN DIEGO, Sept. 25, 2019 /PRNewswire/ -- Evofem Biosciences, Inc., (NASDAQ: EVFM), a clinical-stage biopharmaceutical company, will present and host investor meetings at the upcoming 2019 Cantor Global Healthcare Conference in New York, NY.

The Company's presentation is scheduled for 8:55am EDT on Friday October 4, 2019 in the Empire Ballroom 2 of the InterContinental New York Barclay, with a breakout to follow in Astor Suite II. The presentation will be webcast live through the Investors section of the Evofem Biosciences website at www.evofem.com and archived for 90-days.

About Evofem Biosciences

Evofem Biosciences, Inc., is a clinical-stage biopharmaceutical company committed to developing and commercializing innovative products to address unmet needs in women's sexual and reproductive health. Evofem Biosciences aims to advance the lives of women by developing innovative solutions, such as woman-controlled contraception and potential protection from certain sexually transmitted infections ("STIs"). The Company is leveraging its proprietary Multipurpose Vaginal pH Regulator (MVP-R™) platform to develop Amphora® (L-lactic acid, citric acid and potassium bitartrate) for birth control and prevention of urogenital acquisition of certain STIs. For more information, please visit www.evofem.com.

About Amphora

Amphora is an investigational MVP-R™ designed to regulate vaginal pH within the normal range of 3.5 to 4.5. This maintains an acidic environment which is inhospitable to sperm as well as certain viral and bacterial pathogens associated with sexually transmitted infections but is integral to the survival of healthy bacteria in the vagina. Amphora met the pre-specified primary endpoint of AMPPOWER, the Phase 3 clinical trial evaluating this MVP-R for the prevention of pregnancy in approximately 1,400 women at 112 centers in the United States. In this clinical trial, Amphora had a favorable safety profile and was well tolerated. The Company plans to re-submit the Amphora New Drug Application (NDA) in the fourth quarter of 2019.

The Company expects to report top-line data in the fourth quarter of 2019 from AMPREVENCE, the double-blinded placebo-controlled Phase 2b clinical trial of Amphora to prevent urogenital acquisition of *Chlamydia trachomatis* (primary endpoint) and *Neisseria gonorrhea* (secondary endpoint) in women. This study enrolled approximately 850 women at approximately 50 centers in the United States. There are currently no therapeutics approved for the prevention of either STI.

Amphora® is a registered trademark and MVP-R™ is a trademark of Evofem Biosciences, Inc.

Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, including statements related to the timing of the planned NDA Amphora re-submission for prevention of pregnancy, potential FDA approval of Amphora, and the potential commercial launch of Amphora, the anticipated results of the Phase 2b clinical trial of Amphora to prevent urogenital acquisition of *Chlamydia trachomatis* and *Neisseria gonorrhea* in women, and any expected completion

date or general timing for this clinical trial. Each of these forward-looking statements involves risks and uncertainties. Actual results may differ materially from those, express or implied, in these forward-looking statements. Important factors that could impair the value of Evofem Biosciences' assets and business are disclosed in the risk factors contained in its Annual Report on Form 10-K filed with the Securities and Exchange Commission and subsequent filings. All forward-looking statements are expressly qualified in their entirety by such factors. Evofem Biosciences does not undertake any duty to update any forward-looking statement except as required by law.
